# Anthony Hoang

hoanganthony2207@gmail.com | LinkedIn | Website | GitHub | Bronx, NY

## Education

**DeWitt Clinton High School** Sep 2021 – Jun 2025
*Computer Science Pathway* *Bronx, NY*

## Experience

**Deep24 (YC W24)** Mar 2026 – Apr 2026
*Software Engineer Intern* *San Francisco, CA (Remote)*

- Owned the redesign and frontend development of a product landing page, building its core structure and UI using **React** and **Tailwind**.
- Built a full-stack agent trace viewer, enabling drag-and-drop transcript submission and dual-format (.md/.txt) rendering through **AWS S3**, **React Dropzone**, and syntax highlighting.
- Built a profile projects feature with drag-and-drop reordering and form validation with **React Hook Form** and **Zod**, supporting full CRUD capabilities.
- Developed a GitHub contribution graph using the **GraphQL API** with **Redis** caching (TTL-based expiry + negative caching), rate limiting via **Express.js** middleware, and OAuth identity linking through **Supabase** and **TanStack Query**.
- Improved workflow feed usability by introducing a search bar with backend queries powered by **Prisma**, alongside app-wide reliability improvements using React error boundaries and a custom 404 page.
- Refactored global styling conflicts and standardized UI components with **Shadcn UI**, improving consistency across the application.

**Magic Hour (YC W24)** Mar 2025 – Sep 2025
*Software Engineer Intern* *San Francisco, CA (Remote)*

- Built and shipped the new landing page, increasing signup conversion rate by **12%** over 30 days.
- Improved conversion-focused user flows for Lip Sync, Image-to-Video, and AI Headshot Generator by redesigning interfaces for clearer, more intuitive interactions.
- Shipped the Image-to-Video free-tool form redesign and built form patterns that were later adopted across the majority of free product page tools.
- Contributed to shipping the redesign of the Pricing and My Library pages, improving clarity and user experience.
- Developed and launched new product pages (*AI Meme Generator, AI GIF Generator, Photo Colorizer*), driving visibility and SEO growth.
- Improved performance and accessibility across core pages (Home, Pricing) by identifying and resolving issues via **Google Lighthouse**, aligning with WCAG standards.
- Shipped core product experiences with **Next.js**, **TypeScript**, **Zod**, **Tailwind**, and **Shadcn UI**, reducing delivery friction through reusable form and interface patterns.

## Projects

**Resume Analyzer** | GitHub | npm Aug 2026

- Developed an interactive AI-powered CLI (npm, **750+** downloads) that analyzes resumes against job descriptions, identifying strengths, gaps, and missing keywords, using TypeScript, Node.js, Commander.js, Clack, the Vercel AI SDK, and Zod.

**Tracemark** | GitHub | Website Jun 2026 – Aug 2026

- Built and published a Chrome Web Store extension that lets users annotate webpages and export or copy the result as an image for design feedback, using WXT, React, TypeScript, Fabric.js, and Shadcn UI.

**License Generator** | GitHub | npm Dec 2025 – Jan 2026

- Developed an interactive CLI (npm, **3k+** downloads) that generates open-source licenses from GitHub's Licenses API, using TypeScript, Node.js, Commander.js, and Clack.

## Skills

**Languages**: TypeScript, JavaScript, HTML5, CSS3
**Frameworks**: Next.js, React.js, Electron.js, Express.js, Node.js, tRPC, Tailwind CSS
**Libraries**: TanStack Query, Prisma, Drizzle, Vitest, Jest, Zod, Zustand, Shadcn UI, Vercel AI SDK, OpenAI API
**Databases**: Supabase, Neon, PostgreSQL, SQLite
**Tools**: Git, GitHub, Linear, Figma, Vite, Vercel, Google Lighthouse, Neovim, Claude Code, VS Code
